<i>(Please circle)</i> Type of exams: Common test / CA / SA	Mark	Which are the reasons for loss of mark? <i>(Please tick below and you can tick more than one per row.)</i>				
		Don't understand question	Don't know how to solve	Copy the numbers wrong	Calculate incorrectly	Using wrong units
Paper 1						
Paper 2						
Total						
<i>Grade aiming for Next Exam</i>						

Must Know Math Study Tip:

1. A child's average attention span is only about 10 to 15 minutes. Have a short break of 2 minutes for every 15-minute interval.
2. Daily Math revision should cover at most 2 Short-answer questions, 2 structured questions and 1 Long-answer question. This prepares the child for the final year exam starting today. This is not only less stressful for the child but also helps the child to get the most out of every revision.
3. Always spend the last 5 minutes of revision time to recap and recall. Let your child share with you what he has learnt. Spend another 5 minutes to redo those questions he got wrong. By getting them right, it builds his confidence and ends the session on a high note.
